Alan Moss (Moderator)

VP of Marketing @ Miura Systems Ltd.

Alan Moss is currently working as VP of Marketing at Miura Systems, a leading global provider of secure mobile acceptance technology. In parallel, Alan is Head of Fintech and Payments at the consulting company, BluSpecs Innovation.

Alan has over 20 years' experience in the electronic payments business, working with industry leaders such as Hypercom, Thales and Verifone, in a variety of roles from business development and product marketing to global relationship management. Alan also worked in international sales for De La Rue's security holographics and security print divisions.

Prior to working for BluSpecs, Alan was VP of Business Development at Verifone, where he was responsible for the deployment of new value-add applications and services in Europe. Whilst at Verifone, Alan was also a board member and Chairman of the General Assembly of Nexo, a leading pan-European standardization initiative promoting the interoperability of card payments.

Alan holds an International MBA from Madrid's leading business school, Instituto de Empresa, as well as a bachelor's degree from the University of London.

Arjun Kakkar

VP of Strategy & Operations @ Ekata

Arjun manages Ekata's Payments business and is responsible for payments products, global revenue, and growth. He leads internal and external teams to drive value across Ekata's Payments customers. Ekata provides thousands of businesses global digital identity verification to enable a frictionless customer experience while keeping fraud at check. Before Ekata, Arjun was a Principal with Booz & Company, where he led engagements to help CxOs of Fortune 500 companies explore growth opportunities and solve business problems. Arjun has a B.Tech from IIT Bombay and an MBA from The Wharton School.

PSD2 SCA: How Merchants and Payment Providers Can Maximize Acceptance

PSD2 SCA Intent: Improve Consumer Trust

European Banking Authority's Opinion on PSD2 SCA

The revised [Payment Services Directive \(PSD2, Directive 2015/2366/EU\)](#), proposed by the European Commission in July 2013 PSD2 became applicable on 13 January 2018. It facilitates innovation and competition in the EU retail payment market. It gives consumers more and better choice and introduces higher security standards for online payments. **This makes consumers more confident when buying online.**

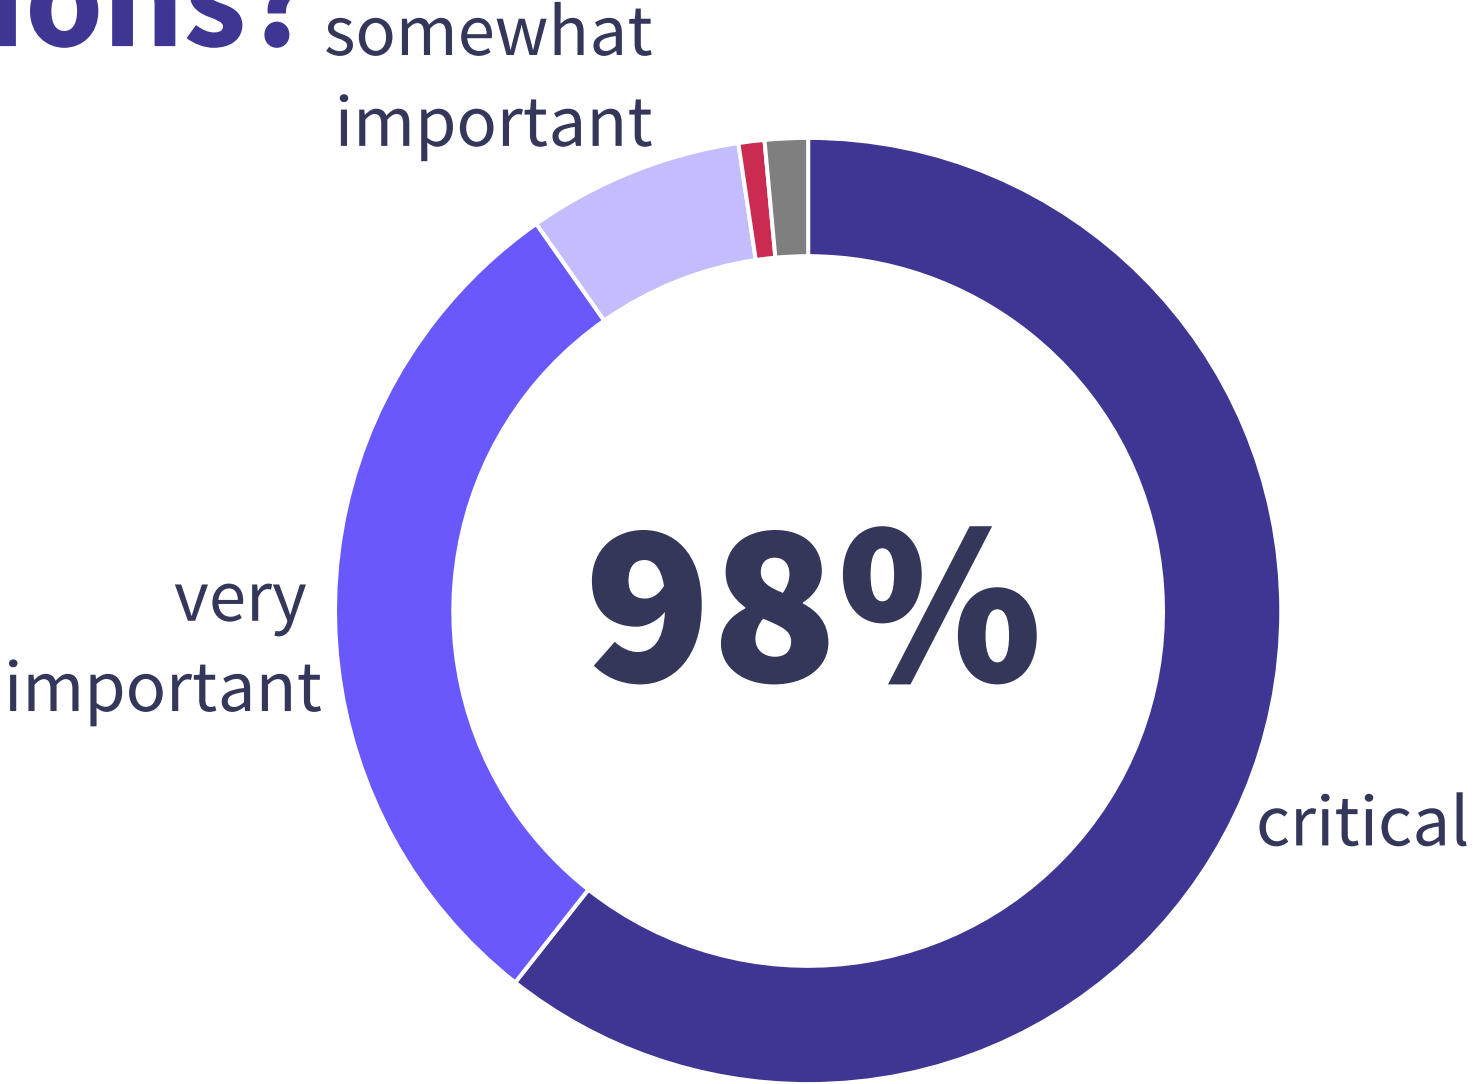

TRUST

Does Trust matter for online transactions?

Source: EKATA Survey of 7,000 consumers in US and EU (2019)

Source: EKATA survey of 3000 NA and 4000 EU participants, conducted by VansonBourne. Question: “When using an online platform (including marketplaces, payment platforms, and online lenders), how important is it that you trust the platform that you’re using?”, asked to all respondents

Impact of fraud on consumers' behavior

Source: EKATA Survey of 7,000 consumers in US and EU

Source: EKATA survey of 3000 NA and 4000 EU participants, conducted by VansonBourne. Question: “How likely is it that you would do the above if you were to experience fraudulent activity when using a company’s online platform?”, asked to all respondents

92% agree

“I want a **fast, frictionless experience** but I also want it to be as **trustworthy and secure as possible** when I use a company’s digital platform”

The Harsh Reality of PSD2 SCA

Stricter fraud thresholds for exemptions

More steps to make payment
3DS2 – 35+ seconds to complete

More false declines to meet stricter fraud thresholds

3DS processing cost
Potential authentication fees
Organizational and development costs

TRUST

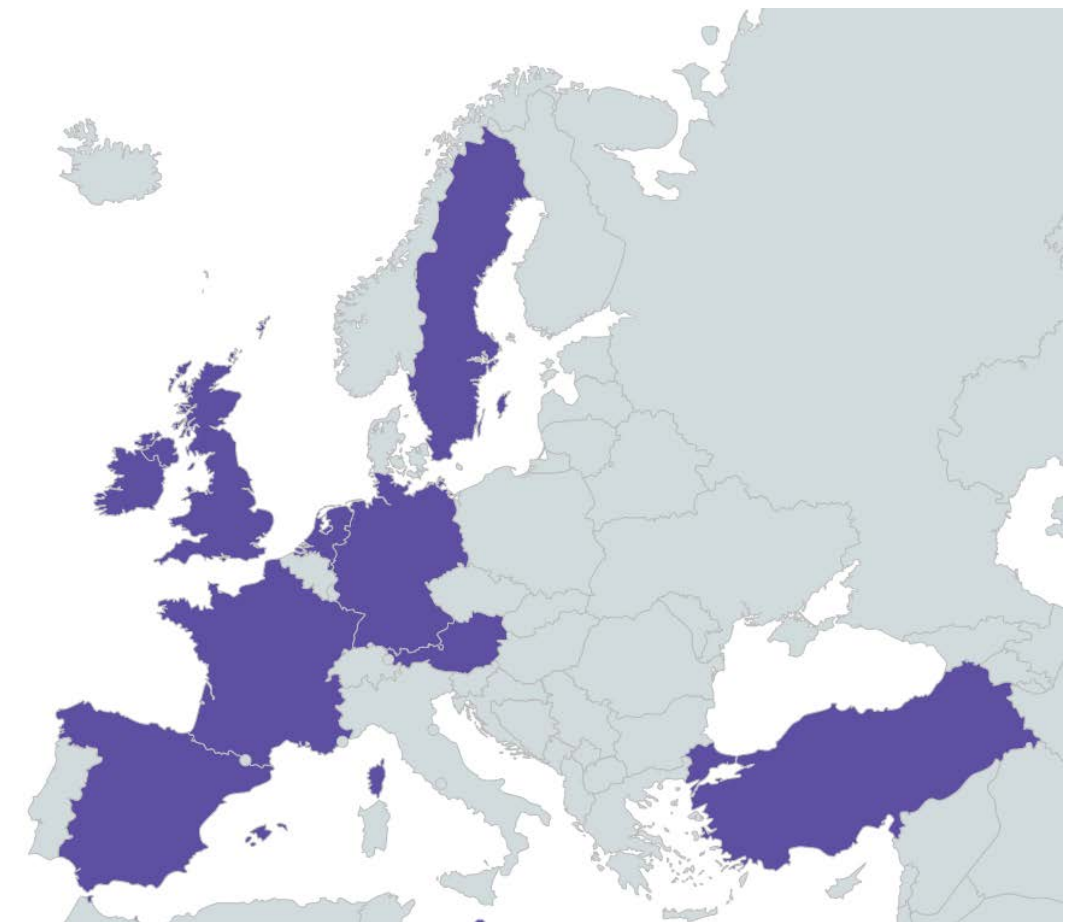

Learnings from Acquirers / PSPs which represent >60% of European CNP volume

Locations of Companies Interviewed

Understand out-of-scope transactions

Impact on EU eCommerce by Volume

Enable Low-Friction Options

- Merchant Initiated Transactions (MIT) - recurring, top-ups, installments
- Biometrics
- Low Value Payments
- Whitelists

Minimize authentication

MERCHANT

- Leverage biometrics
- Plan to get whitelisted
- Identify and tag MIT (out-of-scope)
- Identify and tag low-value exemptions

PROCESSOR / PSP

- Educate and help merchants, particularly those with limited resources

“

*Merchant Awareness is 100%
But Understanding is 30%
... inconsistent acquirer communications*

Share data for risky transactions

MERCHANT

- Recognize that risky transactions require 3DS
- Utilize latest version of 3DS – high friction, but the lesser evil
- Required for biometric authentication
- Know your processor's capabilities

PROCESSOR / PSP

- Get to 3D Secure 2
- Support merchants to upgrade

**~9 out of 10 ready
with 3DS**

Know and optimize for the ecosystem

MERCHANT

- Understand and reach out to issuers
- Work with payments providers who can maximize conversions
- Large merchants – smart route across multiple acquirers

PROCESSOR / PSP

- Be ready with a strong understanding of issuers
- Offer solutions such as smart routing and full liability shift

Over half consider offering full liability shift as a service

Optimize fraud rate

MERCHANT

- Ensure you qualify for exemptions by targeting the right fraud rate
- Allow time to iterate and stabilize to target rates
- Utilize data and ML models to get to below the threshold rates

PROCESSOR / PSP

- Offer advanced fraud solutions to get merchants below stringent thresholds

75%+

of PSPs processing over €1B will utilize AI-based Fraud Screening

Over 90% offer rules-based fraud screening already

Build a differentiated TRA model

MERCHANT

- Decide to build own TRA or work with a PSP
- Feed the Transaction Risk Analysis the best data. Don't just stop at EBA's RTS requirements.

PROCESSOR / PSP

- Offer a differentiated TRA utilizing merchant and third-party data
- Get merchant and 3rd party data to a consistent, normalized format

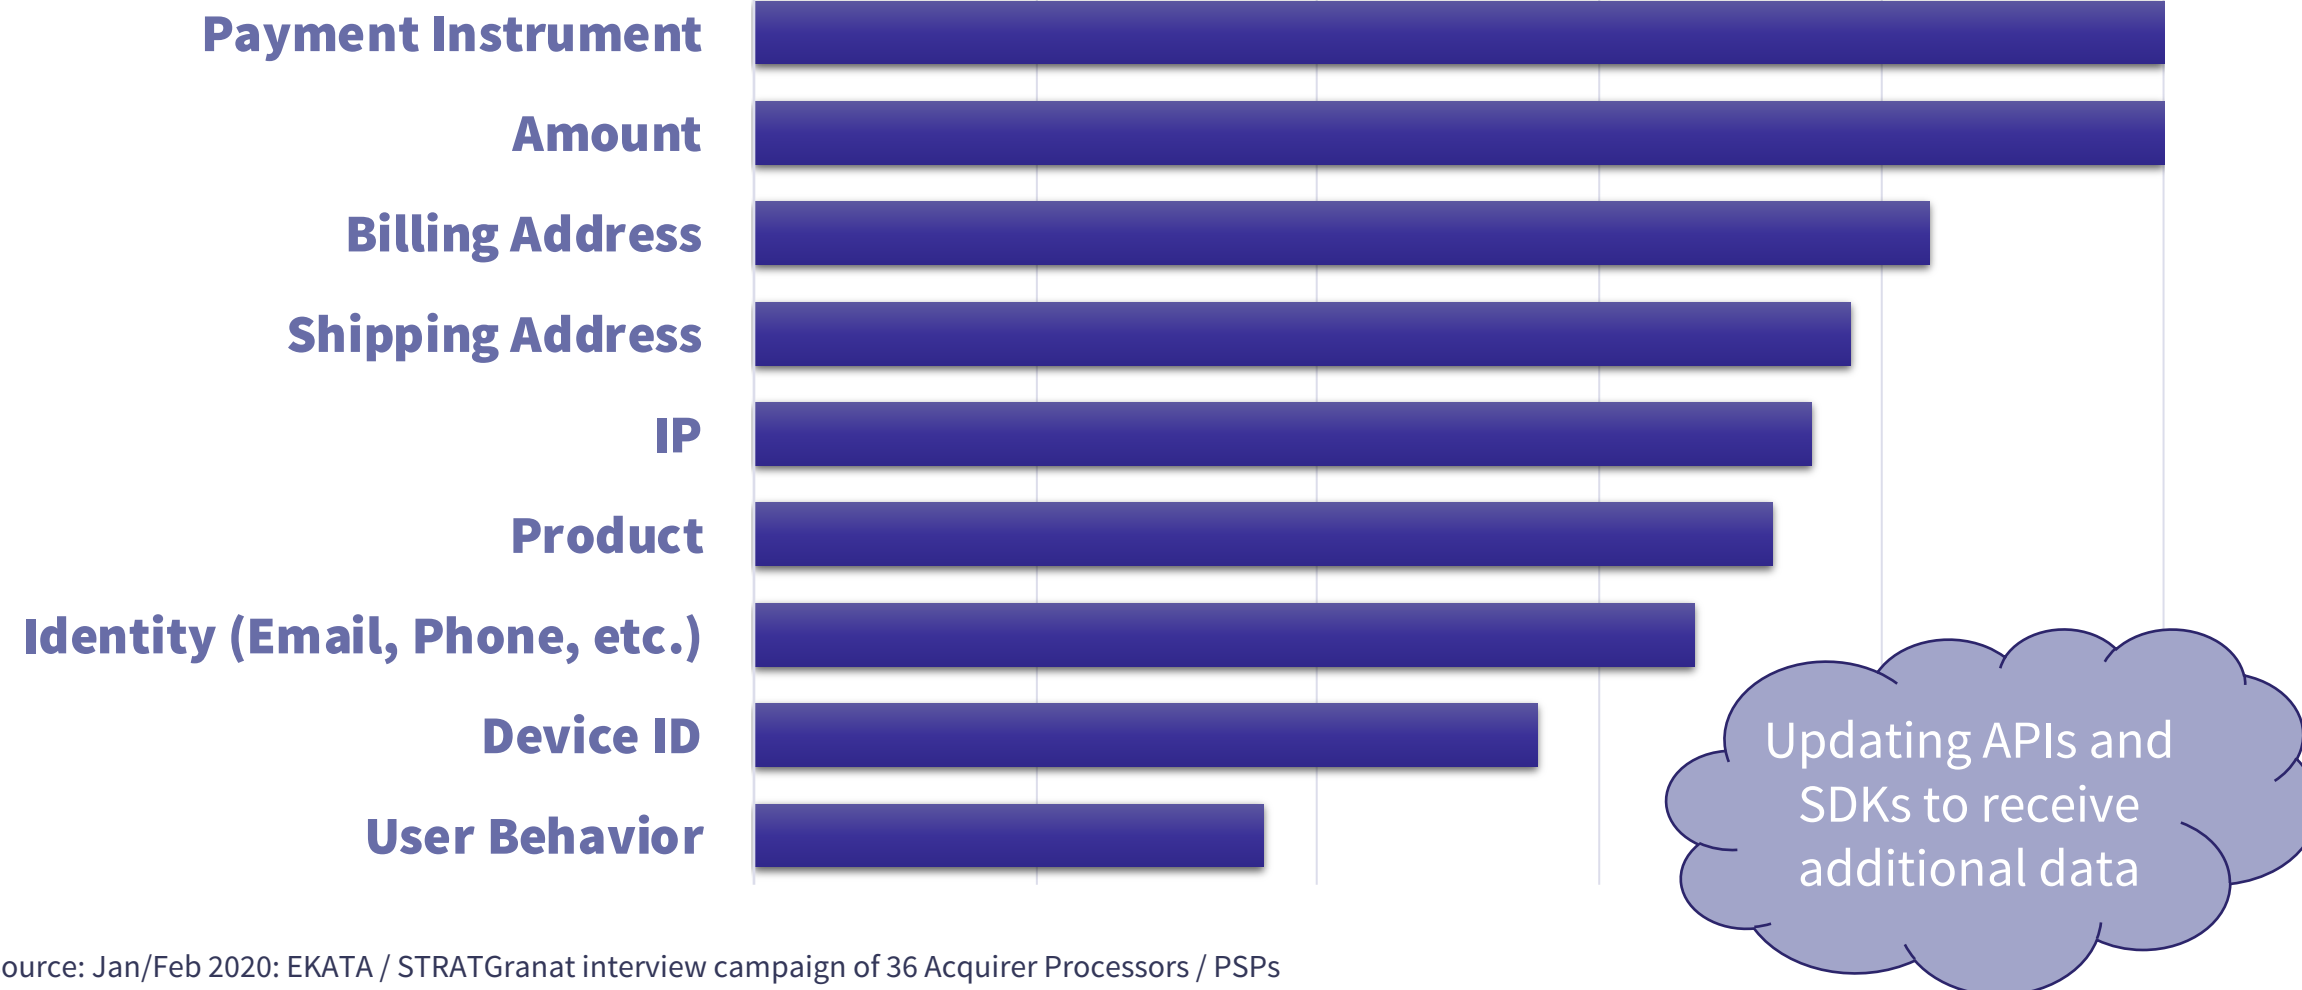

“

TRA could be an opportunity to provide added value to the customers, increase market share and generate a new revenue stream¹

Get and supplement additional data

% Receiving Data Elements from Merchants

0% 20% 40% 60% 80% 100%

Source: Jan/Feb 2020: EKATA / STRATGranat interview campaign of 36 Acquirer Processors / PSPs

Takeaways

EXECUTION

Manage the basics to minimize consumer friction

RELATIONSHIPS

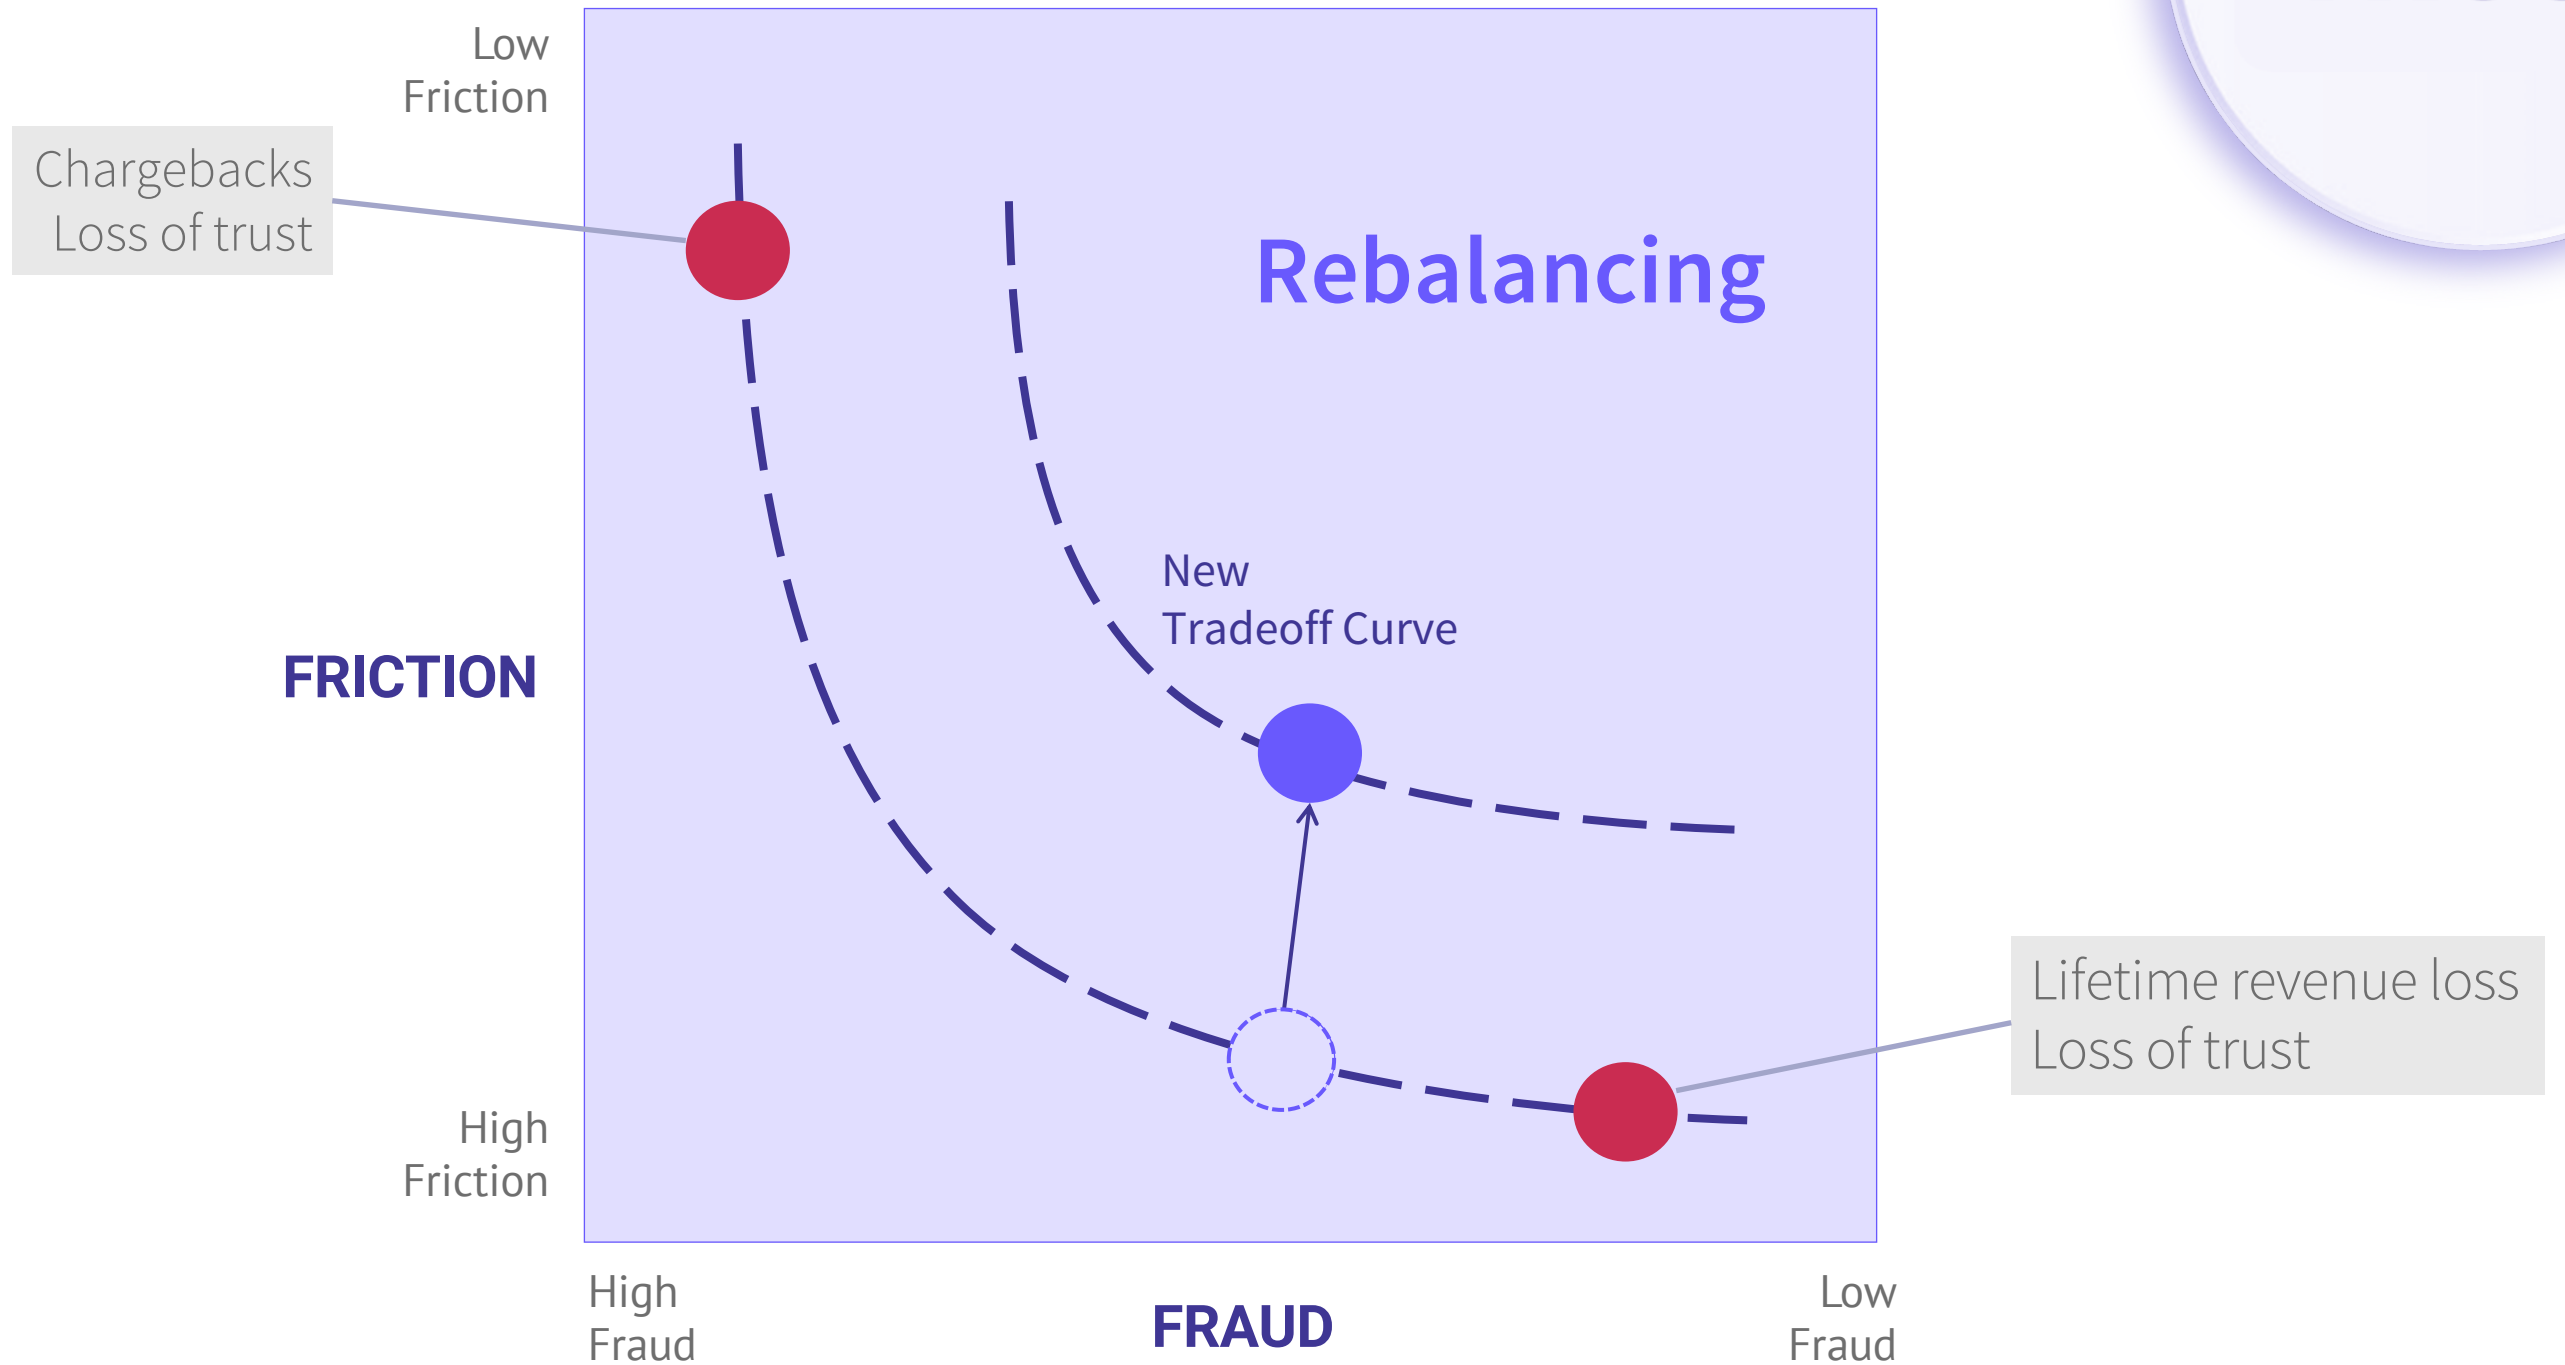

Proactive data usage & sharing between merchants and issuers

CAPABILITIES

Better data and better models

TRUST

A person is shown from the side, sitting at a desk and using a laptop. Their left hand is on the keyboard, and their right hand is holding a smartphone. The entire image is covered with a semi-transparent blue overlay. Overlaid on this are various white digital icons and patterns, including a grid of dots, a network of lines connecting nodes, a globe, a lightbulb, a magnifying glass, a smartphone, a laptop, a mail icon, a percentage sign, and a speech bubble. The word "Questions?" is written in a large, white, sans-serif font in the center of the image.

Questions?
